XDEMVY® gives you Might Over Mites™

XDEMVY is here

xdemvy®
(lotilaner ophthalmic solution) 0.25%

XDEMVY is the first and only FDA-approved treatment for patients troubled with *Demodex* blepharitis, an eyelid disease estimated to impact approximately 25 million eye care patients in the United States.[1-3]

We invite you to join us and a select group of your peers for one of our *DemodeX*perience discussions! Your host will be Andrew Morgenstern, OD, who will discuss the data and clinical results behind XDEMVY.

INDICATIONS AND USAGE

XDEMVY (lotilaner ophthalmic solution) 0.25% is indicated for the treatment of *Demodex* blepharitis.

IMPORTANT SAFETY INFORMATION:

WARNINGS AND PRECAUTIONS

Risk of Contamination: Do not allow the tip of the dispensing container to contact the eye, surrounding structures, fingers, or any other surface in order to minimize contamination of the solution. Serious damage to the eye and subsequent loss of vision may result from using contaminated solutions.

Please see additional Important Safety Information on next page.

IMPORTANT SAFETY INFORMATION (cont'd)

Use with Contact Lenses: XDEMVY contains potassium sorbate, which may discolor soft contact lenses. Contact lenses should be removed prior to instillation of XDEMVY and may be reinserted 15 minutes following its administration.

ADVERSE REACTIONS: The most common adverse reaction with XDEMVY was instillation site stinging and burning which was reported in 10% of patients. Other ocular adverse reactions reported in less than 2% of patients were chalazion/hordeolum and punctate keratitis.

To report SUSPECTED ADVERSE REACTIONS, contact Tarsus Pharmaceuticals, Inc. at 1-888-421-4002 or the FDA at 1-800-FDA-1088 (www.fda.gov/medwatch).

Please see full Prescribing Information.

Available by prescription only.
